

## Installer Briefing: Key Updates

### Real-Time Inventory + Direct Ordering APIs for Installers

Installers can now streamline operations and gain real-time visibility with two powerful new APIs. The [Inventory API](#) delivers live stock levels by warehouse—giving your team direct access to item availability inside your own systems without exposing pricing data. The [Order API](#) enables you to submit orders directly from your platform, with all submissions entering as quotes; this requires standard part-number mapping between your system and ours. Both APIs are live today and built for teams with the technical capability to integrate and maintain API connections.

Ready to eliminate manual steps and connect your workflows? [Get started here](#):

### Lightreach PPA's now available through Soligent

LightReach is a Third Party Ownership solar plan offering lease and PPA options to help homeowners avoid high upfront costs and rising interest rates—so they can start saving in year one.

Key Details:

- Low-Risk Alternative for Homeowners
- Fast Approvals & Payouts
- Quality and Protection Guaranteed

## Regional Market Watch

### Reliability Is Replacing ROI in Texas

Texas has officially become the fastest-growing solar + storage market in the U.S., and the driver isn't savings—it's survival. With ERCOT demand surging from data centers and population

growth, grid instability and price volatility are reshaping homeowner priorities. Batteries are no longer an upsell—they're becoming the expectation.

For installers, this is a clear shift in how deals are won. Homeowners are prioritizing backup duration and outage protection over payback periods, while rising electricity rates are making solar a fixed-cost hedge in an increasingly unpredictable, deregulated market.

*The opportunity is simple: lead with reliability, not ROI.* Position storage as protection against outages and price spikes, not just bill savings. With peak summer demand approaching and grid pressure intensifying, urgency is your strongest close—every delay leaves customers exposed to higher costs and greater risk.
